USB?C Charge Cable (1m)

As part of our efforts to reachcarbon neutrality by 2030, iPhone 15 and iPhone 15 Plus do not include a power adapter or EarPods. Included in the box is a USB?C Charge Cable that supports fast charging and is compatible with USB?C power adapters and computer ports.

We encourage you to use any compatible USB?C power adapter. If you need a new Apple power adapter or headphones, they are available for purchase.

iPhone and the Environment

iPhone 15 and iPhone 15 Plus are designed with the following features to reduce their environmental impact:18

Apple and the Environment

We?re committed to making our products without taking from the earth, and to become carbon neutral across our entire business, including products, by 2030.

* To identify your iPhone model number, seesupport.apple.com/en-gb/HT3939. For details on 5G and LTE support, contact your provider and seeapple.com/uk/iphone/cellular. Mobile data technology support is based on iPhone model number and configuration for GSM networks.

Available space is less and varies due to many factors. A standard configuration uses approximately 12GB to 17GB of space, including iOS 18 with its latest features and Apple apps that can be deleted. Apple apps that can be deleted use about 4.5GB of space, and you can re-download them from the App Store. Storage capacity subject to change based on software version, settings and iPhone model.

iPhone 15 and iPhone 15 Plus are splash, water and dust resistant and were tested under controlled laboratory conditions with a rating of IP68 under IEC standard 60529 (maximum depth of 6 metres up to 30 minutes). Splash, water and dust resistance are not permanent conditions. Resistance might decrease as a result of normal wear. Do not attempt to charge a wet iPhone; refer to the user guide for cleaning and drying instructions. Liquid damage not covered under warranty.

Carbon reductions are calculated against a baseline scenario: 1) No use of clean electricity for manufacturing or product use, beyond what is already available on the grid (based on regional emissions factors). 2) Apple?s carbon intensity of key materials as of 2015 (our baseline year for our 2030 product carbon-neutrality goal). Carbon intensity of materials reflects use of recycled content and production technology. 3) Apple?s average mix of transport modes (air, rail, sea, land) by product line across three years (fiscal years 2017 to 2019) to best capture the baseline transportation emissions of our products.

We estimate the percentage of electricity-related emissions in our manufacturing that is sourced from clean electricity by attributing to our carbon model clean energy procured by our suppliers in the prior fiscal year, based on the supplier manufacturing allocations at time of product launch. Included in this number is only clean electricity that Apple or its suppliers have procured as part of Apple?s Supplier Clean Energy Programme.

Apple?s Regulated Substances Specification describes Apple?s restrictions on the use of certain chemical substances in materials in Apple products, accessories, manufacturing processes, and packaging used for shipping products to Apple?s end?customers. Restrictions are derived from international laws or directives, regulatory agencies, eco?label requirements, environmental standards and Apple policies. Every Apple product is free of PVC and phthalates except for AC power leads in India, Thailand (for two?pin AC power leads) and the Republic of Korea, where we continue to seek government approval for our PVC and phthalates replacement. Apple products comply with the European Union Directive 2011/65/EU and its amendments, including exemptions for the use of lead such as high-temperature solder. Apple is working to phase out the use of these exempted substances for new products where technically possible.
